

# Cameron LNG<sup>LLC</sup>

AN AFFILIATE OF SEMPRA LNG

Cameron LNG, LLC ("Cameron LNG"), a subsidiary of Sempra Energy, with its principal office located at 101 Ash Street, San Diego, California 92101, filed an application with the Federal Energy Regulatory Commission ("Commission") on July 18, 2006. In its application, Cameron LNG requests, among other things, authority under section 3 of the Natural Gas Act (NGA) and Part 153 of the Rules and Regulations of the Commission for modifications to the liquefied natural gas ("LNG") import terminal approvals that the Commission previously granted in Hackberry LNG Terminal, L.L.C., Preliminary Determination on Non-Environmental Issues, 101 FERC ¶ 61,294 (2002) ("Preliminary Determination"); Cameron LNG, LLC, Order Issuing Certificates and Granting Requests for Rehearing, 104 FERC ¶ 61,269 (2003) ("Original Certificate Order"); Cameron LNG, LLC, Order Amending Section 3 Authorization, 111 FERC ¶ 61,018 (2005); and Cameron LNG, LLC, Order Amending Certificates and Section 3 Authorization, 115 FERC ¶ 61,229 (2006). The Commission has assigned Docket No. CP06-422-000 to this application.

In particular, the application seeks authority to expand the LNG terminal facilities previously approved: (i) to increase to 2.65 Bscf/d the send-out rate of the terminal from the previously certificated send-out rate of 1,500,000 Dth/d; (ii) to increase LNG storage capacity from 480,000 m<sup>3</sup> to 640,000 m<sup>3</sup> through the addition of a fourth storage tank; (iii) to increase the LNG unloading rate at each berth; (iv) on an interim basis, while the expansion facilities are being constructed, to increase to 1.8 Bscf/d the send-out rate from the previously certificated send-out rate of 1,500,000 Dth/d and (v) to modify the Btu control unit to include an option for diluting the send-out gas with an inert gas stream in addition to or as an alternative to the liquids-stripping facility previously identified by Cameron LNG in earlier applications. Cameron LNG has requested the Commission to issue a final order granting the requested authorizations by February 1, 2007.

A general location map of the Cameron LNG project is available at [www.sempralng.com/Pages/Terminals/Cameron/maps.htm](http://www.sempralng.com/Pages/Terminals/Cameron/maps.htm).

If you are interested in reviewing the Cameron LNG application, it will be made available at the Cameron Parish Public Library, Hackberry Branch, at 983 Main Street, Hackberry, Louisiana 70645. The application is also on file with the Commission and open to public inspection. It is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at [www.ferc.gov](http://www.ferc.gov) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at

[FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov) or toll free at (866) 208-3676. For TTY, contact (202) 502-8659.

Hard copies of the LNG Terminal application may be requested from:

Stacy Van Goor  
 Director of Federal Regulatory Affairs  
 Sempra Global  
 101 Ash Street, HQ8  
 San Diego, CA 92101

[SVangoor@SempraGlobal.com](mailto:SVangoor@SempraGlobal.com)

Any questions about this application should be directed to contact information above or by calling (877) SEMPRA9.

On December 22, 2005, the Commission's staff granted the request of Cameron LNG to use the National Environmental Policy Act ("NEPA") Pre-Filing Process. Now, with the filing of the application, the NEPA Pre-Filing Process has ended. From this time forward, Cameron LNG's proceeding will be conducted only in the docket referenced in the caption of this notice.

The Commission's most recent landowner pamphlet entitled "An Interstate Natural Gas Facility on My Land? What Do I Need to Know?" explains the Commission's certificate process and addresses some of the basic concerns of landowners. A copy of this pamphlet is available at [www.ferc.gov](http://www.ferc.gov) or by contacting the Commission's Office of External Affairs at (866) 208-3372 (toll-free) or (202) 208-1088. That office will answer any further questions about the procedures involved. Cameron LNG is sending copies of the Commission's notice of application that provides the date by which timely motions to intervene are due, together with the Commission's information sheet on how to intervene in Commission proceedings to affected landowners.

Cameron LNG strives to be a good neighbor and believes that its project will bring many benefits to the local community and region by providing hundreds of construction jobs, full-time positions and tax revenues, to name a few. Additionally, the project will play an integral role in providing competitively-priced supplies of natural gas to the nation, which in turn may help local manufacturers that rely on natural gas to run their operations more efficiently. If you have any questions or comments regarding the Cameron LNG project, please feel free to use the contact information above.
